Forecast for Wednesday 21 Dec 2022

Weather: Cloudy with outbreaks of heavy rain at first. The rain, perhaps falling as sleet and wet snow on higher summits, clears around dawn with cloud soon breaking clearing to leave a bright day with some good spells of sunshine and perhaps just the odd light shower. Cloud increases again through the evening with outbreaks of rain spreading east.

Chance of cloud-free hill tops above 600m: Close to zero at first but soon rising to 80%, decreasing again later.

Low cloud and visibility: Persistent cloud above about 450-600m soon breaking to become just small amounts around summit level, cloud above 600m then increases through evening. Away from cloud visibility several kilometres in rain and perhaps around a kilometre in summit snow, but excellent through daylight hours.
